SEO audit SOFTWARE

GEO AUDIT (GENERATIVE ENGINE OPTIMIZATION)

Can AI search find and quote this page?

https://seoaudit.agency

AI Search Readiness · audited on 02 Nov 2026

Needs work

1 blockers found, 4 warnings and 11 checks passed.

SUMMARY

The page scores 71 out of 100 for AI search

AI search engines (Google AI Overviews, ChatGPT, Gemini, Perplexity) rely on clean crawler access, structured data, clear answers and recognized authority.

BLOCKERS	WARNINGS	CHECKS PASSED
1	**4**	**11**
Stop AI from quoting	Limit citation chance	AI-ready signals

Score by area

Fix these first

Clear answers
Clear answer near the top

AI search quotes short, direct answers. Pages that bury the answer are skipped.

Structured data
Article schema with author

AI answers prefer content with a clear author and a recent date.

Structured data
Breadcrumbs

Breadcrumbs show where the page sits on the site, which helps AI understand context.

PROBLEMS

What stops AI from quoting the page

These issues prevent Large Language Models and AI crawlers from indexing, understanding, and extracting facts from the page.

Blocker · Clear answers **Clear answer near the top**
Why it matters

AI search quotes short, direct answers. Pages that bury the answer are skipped.

How to fix

Open with a 40–60 word answer to the main question, then add detail below.

AI CRAWLERS & LLMS.TXT

AI bot access & machine-readable context

AI models use dedicated web crawlers to gather live information. robots.txt and llms.txt control their permissions.

AI CRAWLERS ALLOWED	LLMS.TXT FILE	BLOCKED BOTS	CLEAN WORDS
6 / 6	Missing	0	1896
In robots.txt	AI site context	Restricted AI agents	Body copy text

Major AI crawler access status

CRAWLER	AI PLATFORM	PERMISSION
GPTBot	OpenAI (ChatGPT)	Allowed
OAI-SearchBot	OpenAI search	Allowed
ClaudeBot	Anthropic (Claude)	Allowed
PerplexityBot	Perplexity	Allowed
Google-Extended	Google Gemini	Allowed
CCBot	Common Crawl	Allowed

llms.txt Recommended **Add /llms.txt to help LLMs understand your site in seconds**

llms.txt provides a concise markdown summary designed specifically for AI models, detailing your services, key URLs, and brand facts.

SCHEMA & STRUCTURED DATA

Knowledge graph & entity recognition

Structured data is the primary way AI engines confirm entity types, relationships, FAQs and offerings without hallucination.

SCHEMA TYPES	FAQ QUESTIONS	ENTITY CLARITY
16	13	High
JSON-LD / Microdata	FAQPage markup	Brand definition

Detected Schema.org types

16 Types Active **Page defines clear entity markup**

- Answer
- Country
- FAQPage
- ImageObject
- Offer
- Organization
- Person
- Place
- PostalAddress
- ProfessionalService
- Question
- SearchAction
- Service
- WPHeader
- WebPage
- WebSite

TAKEAWAY

Schema markup is mandatory for AI Search. Ensure Organization, WebPage, and FAQPage schemas are properly nested with accurate attributes.

ENTITY, AUTHOR & TRUST

E-E-A-T signals for generative search

AI models prioritize sources with verifiable authors, recent updates, and transparent business identity.

Author & publisher identity

Named author	**Maqsood Rahman**
Last updated	**19 Oct 2026**
Content language	**en-US**
Publisher	**seoaudit.software**

Trust & citation signals

- ✓ Organization entity identified
- ✓ Internal navigation links (147)
- ✓ External citation references (4)
- ✓ Secure HTTPS protocol

TAKEAWAY

Always display author bylines, author credentials, and last-updated dates prominently on your informational pages.

ANSWER-FIRST CONTENT & FAQ

Content structure for AI summaries

AI answers are extracted from pages that provide concise, direct answers immediately following clear question headings.

FAQ ITEMS	HEADING HIERARCHY	SUBHEADINGS	WORD COUNT
13	True	32	1896
Structured Q&A	Logical outline	H2 and H3 tags	Comprehensive depth

Structuring content for AI extraction

REQUIREMENT	BEST PRACTICE	STATUS
Direct Answer Lead	Provide a 40–60 word summary paragraph directly below H2s	Action Needed
Structured Tables / Lists	Use HTML tables and unordered lists for comparisons and steps	Passed
FAQ Section	Include frequently asked questions matching natural conversational queries	13 Items
Entity Clarity	Define technical terms explicitly before expanding on them	Action Needed

TAKEAWAY

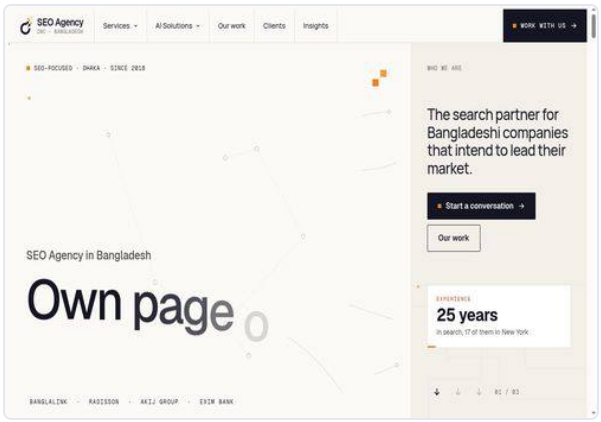

Write in an answer-first inverted pyramid style: answer the core question in sentence 1, then elaborate with examples and bullet points.

TECHNICAL BASICS

The page loads cleanly for crawlers

AI agents must be able to crawl, render, and parse HTML without client-side barriers or broken links.

Visual rendering preview

Technical crawler health

- ✓ HTTP Status: **200 OK**
- ✓ Internal site links: **147**
- ✓ Outbound citation links: **4**
- ✓ Mobile responsive viewport
- ✓ Images missing alt: **0 / 12**
- ✓ Declared language: **en-US**

PASSED CHECKS & NEXT STEPS

Action plan for AI visibility

11 checks passed. Follow this prioritized plan to maximize inclusion in AI Overviews and chat answers.

Key passed checks

- ✓ Organization schema
- ✓ FAQPage schema
- ✓ Question-style headings
- ✓ FAQ section
- ✓ Lists and tables
- ✓ Author name and bio
- ✓ Contact and about pages
- ✓ Freshness date
- ✓ Reviews and testimonials
- ✓ AI crawlers allowed in robots.txt
- ✓ Content without JavaScript

Recommended next steps

This week
Fix crawler & schema blockers

Ensure robots.txt allows major AI bots and deploy Organization and FAQ schemas.

This month
Add llms.txt & author bylines

Deploy an /llms.txt file and verify clear author attribution with publication dates.

Ongoing
Answer-first formatting

Format content with clear question headings followed by direct 40–60 word summary answers.

SUMMARY

Audited 16 GEO readiness checks on 02 Nov 2026 for **seoaudit.software**.
