YOUR RESULTS

6 problems are costing you points

The score is **84** out of 100. Most lost points come from **images** (37), **links** (64) and **speed** (68). Each one can be fixed.

Score by area

The biggest problems

Page has higher JavaScript requests. It's over 300 KB

Speed

Large JavaScript files delay the page becoming usable, especially on phones.

Fix: Remove unused scripts, defer the rest and load third-party widgets only when needed.

Some images name is too long

Images

Long file names are hard to read and look like spam.

Fix: Keep image file names to 5 words or fewer, separated by hyphens.

Some internal links have been used more than 3 times

Links

Repeating the same link many times clutters the page and weakens the anchor text signal.

Fix: Link to each page once or twice per page, from the most relevant spot.

Some H2 tags length is too long

On-page

Very long headings are hard to scan and read like paragraphs.

Fix: Keep headings between 20 and 60 characters and move detail into the body text.

+ 2 more problems and 15 warnings found. **SEO Audit Software** can send you the full list with every fix.

SPEED SNAPSHOT

Fast on desktop, slow on phones

Google mostly ranks a site by how its mobile version works. On phones the page scores **64** for speed, and scripts block taps for **1,727 ms**.

DESKTOP SPEED
Fast
Google Lighthouse score

MOBILE SPEED
Needs work
Google Lighthouse score

ON PHONES	RESULT	GOOD IF UNDER	RATING
Largest Contentful Paint When the main content appears	**1.9 s**	2.5 s	Good
Total Blocking Time How long the page cannot react to taps	**1,727 ms**	200 ms	Poor
Cumulative Layout Shift How much the page jumps while loading	**0**	0.1	Good
First Contentful Paint When the first text or image appears	**1.7 s**	1.8 s	Good
Speed Index How fast the screen fills in	**2.7 s**	3.4 s	Good

Biggest saving on phones: **Enable text compression** (3.28 s), then **Reduce unused JavaScript** (2.09 s). Source: Google Lighthouse lab test, 19 Oct 2026.

Quick wins you can do this week

- [ ] Describe each image in a few words. · 22 of 23 images have alt text
- [ ] Use hyphens instead of underscores in image file names.
- [ ] Put <meta charset="utf-8"> as the first tag inside <head>. · charset declaration missing
- [ ] Check that the robots.txt Disallow rules never block pages you want to rank.
- [ ] Keep headings between 20 and 60 characters and move detail into the body text.
- [ ] Reduce and defer JavaScript, especially third-party scripts. · ready for taps after 2.55 s

NEXT STEP

Want these problems fixed?

The **6** problems and **15** warnings in this audit stay until someone fixes them. **SEO Audit Software** can fix them for you and show the new score.

What we can do for you

1 **Fix the 6 critical problems**
Heavy scripts, image file names, repeated links and long headings, fixed in order of impact.
Critical

2 **Make the site fast on phones**
Mobile speed is 64 today. We cut and delay the scripts that block taps for 1,727 ms.
Speed

3 **Clear the 15 warnings**
Alt text, the charset tag, robots.txt rules and heading lengths: small fixes that add points.
Improve

4 **Check every page, not only this one**
This free audit ran 75 checks on one page. A full site audit finds problems like these on every page.
