Top linking page per website, strongest first

SUMMARY

147 websites link here, 44 look like spam

Links from other websites are votes of trust for Google. The site has solid links from directories, review sites and news sites, but a wave of spam links has arrived since August. **43 of the 44 spam links** were first seen in the last three months.

REFERRING DOMAINS	TOTAL BACKLINKS	AUTHORITY SCORE
147	**781**	**259** / 1,000
– no earlier refresh	top 141 listed, one per website	– no earlier refresh

The 141 linking websites at a glance

Clean: **97** websites Flagged as spam: **44** websites (31%)

What we found

1 **Strong links from trusted sites** — Good

33 clean websites have an authority of 300 or more, led by bbb.org (734), connect.releasewire.com (663), sitelike.org (589).

2 **A wave of spam links since August** — Spam

43 spam sites (casino, poker and “buy backlinks” pages) linked here in the last three months, all with the same two sales texts as anchor.

3 **Almost every link points to the homepage** — Spread

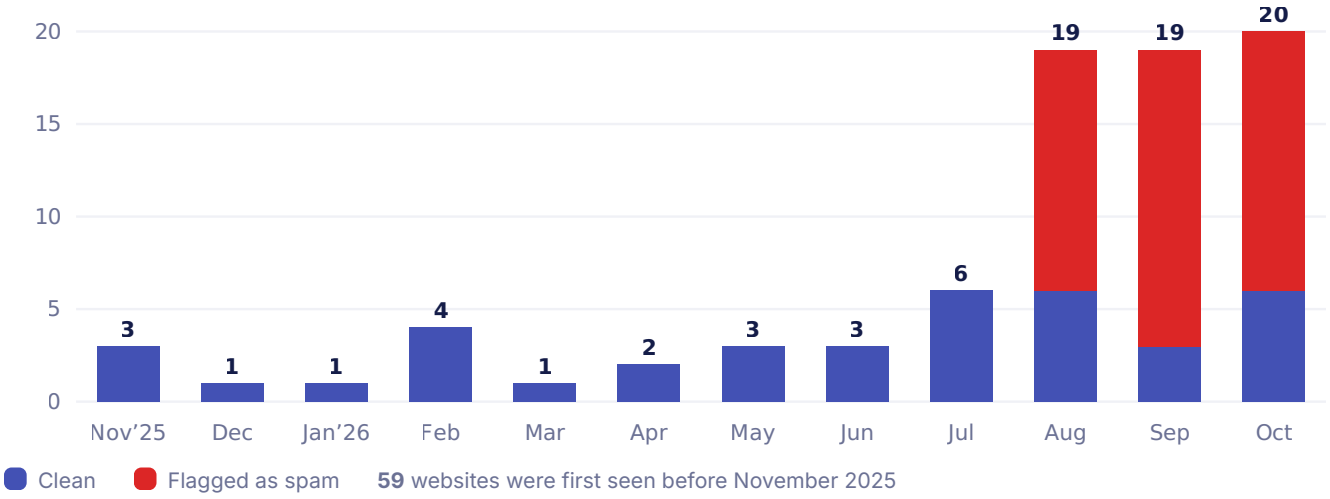

104 of 141 links go to the homepage. Product and feature pages get very few links.

LINK GROWTH & QUALITY

New links jumped in August, mostly spam

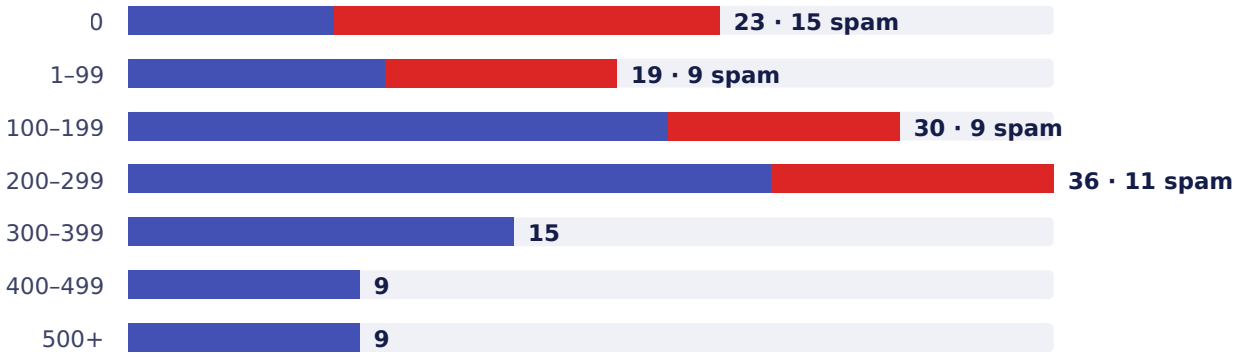

Each bar counts the linking websites by the month their link was first seen. Until July a few good links came in each month. Since August about 20 a month arrive, and **43 of the 58** from the last three months are flagged as spam.

New linking websites per month

Linking websites by authority

Authority of the linking website, 0–1,000 (DataForSEO domain rank). Higher means a stronger, more trusted site.

TAKEAWAY

All 33 websites with an authority of 300 or more are clean. The spam sits at the weak end: no flagged site scores above 262.

TOP REFERRING DOMAINS

Your strongest links come from trusted directories

The clean websites with the highest authority. Keep these profiles up to date: a link from a strong site is worth more than many weak ones.

+ 85 more clean linking websites in the app. Authority 0–1,000. All links listed are follow links.

ANCHOR TEXTS & LINKED PAGES

Half the anchors are your web address

The anchor is the clickable text of a link. It tells Google what your page is about. Branded and web-address anchors look natural, but here **43 of the 70 web-address anchors** are the spam sales texts that contain your domain.

Anchor text mix

Most used anchor texts

ANCHOR TEXT	TYPE	SITES	STATUS
“High Quality Dofollow Backlinks DA 50 PA 40 Premium PBN Network...”	Naked URL	**24**	24 spam
(no text, image link)	Generic	**20**	1 spam
“Premium High DA Backlinks for seoaudit.software to Boost Domain...”	Naked URL	**19**	19 spam
“seoaudit.software”	Naked URL	**18**	Clean
“SEO Audit Software”	Branded	**9**	Clean
“https://seoaudit.software/”	Naked URL	**5**	Clean

+ 37 more anchor texts in the app.

Pages the links point to

Competitor comparison

No competitors are tracked for this website yet. Add competitor websites in the app to compare referring domains, backlinks and authority side by side in the next report.

TOXIC & SPAM LINKS · 44

44 linking websites look like spam

A link is flagged when its spam score is 60 or higher. These sites sell links or host casino and poker pages, and most use one of two “buy backlinks” texts as anchor.

Why it matters

31% of linking sites

Google says it ignores most spam links on its own, so they rarely hurt rankings. But a sudden wave like this one can look like bought links. Keep an eye on it and be ready to disavow if it grows or Google sends a warning.

1. Do not contact these sites or pay to have links removed. They will not reply.
2. Add the flagged domains to your disavow file in the app (next page).

+ 30 more flagged websites in the app (Backlinks → filter “Toxic”). Reason for all: High spam score.

DISAVOW & NEXT STEPS

Clean up the spam, then earn links to inner pages

A disavow file tells Google to ignore links from the domains in it. The app builds it for you from the flagged links.

How to disavow

1. Open Backlinks in the app and filter by “Toxic”.
2. Check each site, then click **Disavow** to add it.
3. Click **Download disavow file**.
4. Upload it in Google's disavow tool: search.google.com/search-console/disavow-links

Domains already in your disavow file: –

Preview of the file

```
# Disavow file for seoaudit.software
# Created with SEO Audit Software on 2026-10-25
# 44 domains
domain:789taya.online
domain:archive-hu.com
domain:bestnz-poker-casinoslot.com
domain:bestonlinecasinomexico.online
domain:betulcrime.com
… 39 more lines
```

Next steps

1 **This week: review the 44 flagged sites**
Add the spam domains to the disavow file and keep it for when you need it. Check again after the next refresh to see if the wave goes on.
Spam

2 **This week: fix 2 broken link targets**
zexprwire.com (548) and technewstab.com (373) link to seoaudit.software/%5C, a mistyped address. Redirect it to the homepage so these strong links count. Also check that the 14 linked old image files still open.
Links

3 **This month: links to feature pages**
104 of 141 links point to the homepage. Ask the review and directory sites that already list you to link to a feature or pricing page too.
Growth

This report was made with **SEO Audit Software** from backlink data refreshed on 25 October 2026. It lists the strongest linking page of each of 141 websites from the DataForSEO index. Backlink data is refreshed every month, so numbers change as links are found or lost.
